

# PORTERVILLE IRRIGATION DISTRICT

## Water Rate Record

1994 - Present

| YEAR   | District<br>Irrigation<br>Water | District<br>Delivered<br>Water | District<br>Sharewater |
|--------|---------------------------------|--------------------------------|------------------------|
| 1994   | 35.00                           |                                |                        |
| 1995   | 30.00                           |                                |                        |
| 1996   | 30.00                           |                                |                        |
| 1997   | 30.00                           |                                |                        |
| 1998   | 30.00                           |                                |                        |
| 1999   | 30.00                           |                                |                        |
| 2000   | 35.00                           |                                |                        |
| 2001   | 40.00                           |                                |                        |
| 2002   | 40.00                           |                                |                        |
| 2003   | 40.00                           |                                |                        |
| 2004   | 45.00                           |                                |                        |
| 2005   | 50.00                           |                                |                        |
| 2006   | 50.00                           |                                |                        |
| 2007   | 50.00                           |                                |                        |
| 2008   | 50.00                           |                                |                        |
| 2009   | 50.00                           |                                |                        |
| 2010   | 50.00                           |                                |                        |
| 2011   | 50.00                           |                                | 10.38                  |
| 2012   | 50.00                           |                                | 10.66                  |
| 2013   | 55.00                           |                                | 11.35                  |
| 2014   | 350.00 *                        |                                | 11.24                  |
| 2015   | 350.00 *                        |                                | 11.89                  |
| 2016   | 75.00                           |                                | 14.53                  |
| 2017   | 65.00                           |                                | 20.53                  |
| 2018   | 85.00                           |                                | 21.12                  |
| 2019   | 55.00                           |                                | 21.53                  |
| 2020** | 70.00                           | 25.00                          | 21.48                  |
| 2021** | 285.00                          | 50.00                          | 18.67                  |
| 2022   | 400.00                          |                                | 13.89                  |
| 2023   | 85.00                           |                                | 16.29                  |
| 2024   | 145.00                          |                                | 17.83                  |

\* In 2014 & 2015, U.S. Bureau of Reclamation did NOT allocate any Class 1 water. Rates here represent the "Emergency Water" rate.

\*\* In 2020-2021, the PID Board allocated groundwater recharge credits for its water supply to Supplemental Assessment parcels in good standing and delivered the actual surface water, for irrigation only, to parcels that have access to the District's distribution system. Please note that the rate for recharge credits is reflected under "Irrigation Water" for budget purposes, while the actual costs to deliver wet irrigation water, in 2020 & 2021, is in the "Delivered water" column.
